PUMP UP YOUR PERFORMANCE WITH FLEXCLOUD

The only cloud platform of its
kind in the direct-selling market.

FLEXCLOUD

POWERED BY INFOTRAX

Your business is one of a kind. FlexCloud keeps it that way. It's the only cloud platform in the industry that custom-fits your business with front-end, back-end and commission managing solutions. FlexCloud is a one-stop platform that can service companies in any stage of growth. Our commission engine handles payout calculations, then uses that data to fuel the rest of the platform with tools for your teams and salesforce. With the following customizable components, FlexCloud will help you outmuscle the competition.

WEBHOOKS SUBSCRIPTIONS

Receive real-time information and data with FlexCloud's Webhooks. FlexCloud pushes instant notifications to your system about everything from autoship cancellations to rank advancements. Choose the alerts you want to receive from our subscription library and monitor them from our easy-to-use dashboard.

We push the notification to the endpoint you choose, then give you the ability to take whatever action makes sense for your business. Request more information from the API, send an email, or update distributor websites and apps. In the event of a system outage, we've got your back with retry logic that preserves your information while you get your system back up and running.

Receive real-time information for your inside teams and salesforce.

EASY CUSTOM REPORTS

FlexCloud now offers an integrated development editor (IDE) to help you get the most out of your data without paying for custom solutions. Our IDE provides you with an easy way to customize your back-end functionality in our domain-specific language, AMPL. Create reports and processes that provide you with meaningful insights about your business, then use our drilldown function to easily extract more details from the results.

FlexCloud's IDE is web-based for your convenience and comes with an easy-to-use library of commands and training videos.

Develop unique reports without paying for custom work.

Easy-to-use editor

PAINLESS INTEGRATION

Customize the look and functionality of your front-facing distributor sites and dashboards with our easy-to-use Software Development Kit. Display information about each distributor's progress and quotas in their personalized dashboards by using the commission-based API data pulled from our commission engine. Then, make it yours by adding personalized logos, icons, and colors.

Our SDK is industry-standard, using OAuth 2.0, an npm package, and open-ID connect to create a web-based solution that's easy to access for both third-party developers and your in-house teams. Fully integrate your front-end sites with back-end operations and commission data by building a custom solution with FlexCloud's new SDK.

Seamlessly blend look and functionality.

Custom integration

COMMISSIONS CALCULATIONS AND MANAGEMENT

FlexCloud is powered by InfoTrax's proprietary FastTree software. It can scale for companies of any size, keeping track of everything from commission calculations to payouts to downline organization. Our software is the fastest and most accurate in the industry, with REST-based APIs that make your data available across the entire platform. When it's time to run your commissions, our Commissions Run Manager allows you to model different payout options and then select the most accurate one to run for the compensation period.

BUSINESS HEALTH MONITORING

The FlexCloud Operations Management dashboard shows key insights into your business's day-to-day successes. Our interactive graphs and charts are customizable, and show you, at a glance, which areas of your business are thriving or need attention. Quickly assess the health of your business, then stay on top of any issues as they arise.

INDUSTRY-SPECIFIC CUSTOMER CARE TOOLS

Our customer care tools have been developed with real industry experience—over 30 years' worth—in mind, giving you the tools that matter most in delivering an outstanding customer interaction. Immediately view the most pertinent customer and distributor information and view recent activity within the last month. Genealogy information, an AR ledger, and more gives you a well-rounded understanding of your distributors and customers, so you can provide better care.

Let FlexCloud do the heavy lifting for your business.
