

PAYMENTS TECHNOLOGY

built for global commerce

NEXIO IS AN

OPEN PAYMENTS PLATFORM

Nexio was created as an open payments platform, designed to give back the leverage and the power every business needs to control and dictate its payments strategy, both locally and globally.

At Nexio, we are giving companies control over their payments, connecting them to the best-in-class tools, and the ability to scale where and when they are ready. We provide a payment orchestration layer built with a modern technology stack in a modular and agile form. With one straightforward integration, companies have access to all the payment technologies needed to participate in the world of global commerce.

CONNECT TO

TOP-TIER FRAUD PREVENTION

Nexio has partnered with Kount, an Equifax company, and the leading-industry fraud prevention tool, to protect your account(s). Kount was integrated into the Nexio APIs from the start, allowing Nexio to use AI and machine learning to work for you as your risk analysis specialist. Nexio has hundreds of settings that you can configure to safeguard against fraudulent card usage, fake accounts, duplicate distributor registrations, and more.

- ✓ **Prevent emerging fraud**
- ✓ **Control business outcomes**
- ✓ **Reduce manual reviews**
- ✓ **Increase acceptance rates**

CREATE A BACKUP PLAN

REDUNDANCY

Never miss out on a sale when a gateway goes down. Through redundancy, Nexio will enable you to have multiple gateways and processors, so you never miss out on a sale transaction.

Maximize Gateway Functions

- Selecting a provider who is best at routing regional processing (APAC, EU, etc.)
- Using your backup payment provider if your merchant account gets shut down
- When one gateway or processor goes down your payments are automatically rerouted

Leverage Multiple Gateways

- Designate specific gateways to be used by country or payment type
- Route transactions to specific gateways
- Collect and analyze shopper data

SCALE GLOBALLY

INTERNATIONAL PAYMENTS

Nexio will partner with you to create scalable global growth and help “Manage the Chaos” of international payments.

Multiple Payment Methods

Increase customer conversion by offering the most popular local payment methods.

Display Local Currencies

Allow customers to see the products on your website in their local currency.

Provide Simplified Refunds

Customer refunds will be in their currency for the total amount of the sale, regardless of exchange rates.

Offer Alternative Payment Methods

Reduce cart abandonment by offering customers their preferred payment methods

CONTROL YOUR DATA

CUSTOMIZED REPORTING

Take the chaos out of collecting data by using Nexio's Consolidated Dashboard. Aggregate data from gateways, processors, 3rd-party software, banks, etc., into single transaction records, chargeback records, and more. This allows you to refine the data into customized reports to focus on driving customer engagement and commerce and improving the overall experience. Every transaction contains valuable information for elevating your payment process.

- ✓ **Real-time data tracking**
- ✓ **Filter by card type, transaction date, and more**
- ✓ **Track sales by currency, region, payment type and more**
